AIM Digital Assets

SCHLOSSBERG&CO

30. April 2022

Description

Schlossberg&Co:
Schlossberg&Co is a quantitative investment management company trading in global financial markets, dedicated to producing exceptional returns for its investors by combining the most sophisticated scientific methods of quantitative finance, machine learning and behavioral finance.
Debt is at an all-time high worldwide. Politicians are printing unprecedented amounts of money to service this debt and hence distorting financial markets worldwide. Our investors benefit from the continued asset inflation while being protected against sudden interest rate and volatility shocks.
Years of research and a strong team of financial experts, physicists and mathematicians from University of St.Gallen (HSG), ETH Zurich and ETH Lausanne have led to break-through innovations in volatility forecasting and time-series predictions. Our proprietary algorithms are constantly learning through machine learning and work in different market regimes. They are able to react instantaneously with direct interfaces to financial markets.
Schlossberg&Co is at the nexus of economics, behavioral finance, data, and technology. Our evolution has been a continuous exploration of what drives markets and how it can be systematically applied to client portfolios.

AIM Digital Assets:
Aim: Maximize the return by investing globally across all asset classes (with a digital focus) and a maximum drawdown target of 50%.
Use Case: Digital Assets are extremely volatile. Use this product as a digital assets substitute in a given portfolio. We constantly manage the risk of volatility and interest rate shocks with the help of our proprietary investment algorithms.

Investment Team

David Bühlmann worked at Deutsche Bank, Julius Bär and HSBC in Zurich, Singapore and Hong Kong. He is an expert in derivatives and quantitative finance and a graduate from HSG.

Boris Kuznetsov holds an M.Sc. in Mathematics and Fin. Eng. from ETH Lausanne (EPFL) and a B.Sc. in Physics from Saint-Petersburg State University. He is an expert in Machine Learning & AI.

Prof. Dr. Semyon Malamud has a PhD from ETH Zurich and is a Professor at ETH Lausanne (EPFL). He is a Swiss Finance Institute Senior Chair and a Research Fellow at the BIS and the ECB.
Serge Birri holds both an M.Sc. in Quantitative Finance and an M.Sc. in Computational Science and Engineering from ETH Zürich. Serge worked for Credit Suisse and Swiss Life in the past.
