

**Description**

**Schlossberg&Co:**  
Schlossberg&Co is a quantitative investment management company trading in global financial markets, dedicated to producing exceptional returns for its investors by combining the most sophisticated scientific methods of quantitative finance, machine learning and behavioral finance. Debt is at an all-time high worldwide. Politicians are printing unprecedented amounts of money to service this debt and hence distorting financial markets worldwide. Our investors benefit from the continued asset inflation while being protected against sudden interest rate and volatility shocks. Years of research and a strong team of financial experts, physicists and mathematicians from University of St.Gallen (HSG), ETH Zurich and ETH Lausanne have led to break-through innovations in volatility forecasting and time-series predictions. Our proprietary algorithms are constantly learning through machine learning and work in different market regimes. They are able to react instantaneously with direct interfaces to financial markets. Schlossberg&Co is at the nexus of economics, behavioral finance, data, and technology. Our evolution has been a continuous exploration of what drives markets and how it can be systematically applied to client portfolios.

**Global-Cross-Asset AIM 40:**  
**Aim:** Maximize the return by investing globally across all asset classes and a maximum drawdown target of 40%.  
**Use Case:** Most equities are overvalued today. Use this product as an equities substitute in a given portfolio. We constantly manage the risk of volatility and interest rate shocks with the help of our proprietary investment algorithms.

**Investment Team**

**David Bühlmann** worked at Deutsche Bank, Julius Bär and HSBC in Zurich, Singapore and Hong Kong. He is an expert in derivatives and quantitative finance and a graduate from HSG.

**Boris Kuznetsov** holds an M.Sc. in Mathematics and Fin. Eng. from ETH Lausanne (EPFL) and a B.Sc. in Physics from Saint-Petersburg State University. He is an expert in Machine Learning & AI.
